Warning

For your own safety, please read this user manual carefully before your initial start-up!

Unpacking Instructions
Immediately upon receiving this product, carefully unpack the carton and check the contents to ensure that all parts are present, and have been received in good condition. Notify the dealer immediately and retain packing material for inspection if any parts appear damaged from shipping or the carton itself shows signs of mishandling. Save the carton and all packing materials. In the event that a fixture must be returned to the factory, it is important that the fixture be returned in the original factory box and packing.

Your shipment includes:
- Showtec Kanjo Spot 60
- IEC power cable (1,5 m)
- 1 mounting bracket and 2 screws for truss mounting
- User manual

LED Expected Lifespan
LEDs gradually decline in brightness over time. HEAT is the dominant factor that leads to the acceleration of this decline. Packaged in clusters, LEDs exhibit higher operating temperatures than in ideal or singular optimum conditions. For this reason, when all color LEDs are used at their fullest intensity, life of the LEDs is significantly reduced. If improving the lifespan is of higher priority, place care in providing for lower operational temperatures. This may include climatic-environmental and the reduction of overall projection intensity.

Safety Instructions
Every person involved with the installation, operation and maintenance of this device has to:
- be qualified
- follow the instructions of this manual

CAUTION! Keep this device away from rain and moisture!
Unplug mains lead before opening the housing!

CAUTION! Be careful with your operations.
With a dangerous voltage you can suffer a dangerous electric shock when touching the wires!
Before the initial start-up, please make sure that there is no damage caused by transportation. Should there be any, consult your dealer and do not use the device.

To maintain perfect condition and to ensure a safe operation, it is absolutely necessary for the user to follow the safety instructions and warning notes contained in this manual.

Please consider that damages caused by manual modifications to the device are not subject to warranty.

This device contains no user-serviceable parts. Refer servicing to qualified technicians only.

**IMPORTANT:**

The manufacturer will not accept liability for any resulting damages caused by the non-observance of this manual or any unauthorized modification to the device.

- Never let the power cord come into contact with other cables! Handle the power cord and all connections with the mains with particular caution!
- Never remove warning or informative labels from the unit.
- Never use anything to cover the ground contact.
- Never lift the fixture holding it by the projector-head, as the mechanics may be damaged. Always hold the fixture by the transport handles.
- Never place any material over the lens.
- Never look directly into the light source.
- Never leave any cables lying around.
- Never loosen the screws of the rotating gobo otherwise you risk opening of the ball bearing.
- Do not insert objects into air vents.
- Do not connect this device to a dimmerpack.
- Do not switch the device on and off in short intervals, as this will reduce the device's life.
- Do not touch the device’s housing bare-handed during its operation (housing becomes very hot). Allow the fixture to cool for at least 5 minutes before handling.
- Do not shake the device. Avoid brute force when installing or operating the device.
- Only use the device indoors, avoid contact with water or other liquids.
- Only operate the fixture after having checked if the housing is firmly closed and all screws are tightly fastened.
- Only operate the device after having familiarized with its functions.
- Avoid flames and do not put close to flammable liquids or gases.
- Always keep the case closed while operating.
- Always allow a free air space of at least 50 cm around the unit for ventilation.
- Always disconnect power from the mains, when device is not used or before cleaning! Only handle the power cord holding it by the plug. Never pull out the plug by tugging the power cord.
- Make sure that the device is not exposed to extreme heat, moisture or dust.
- Make sure that the available voltage is not higher than stated on the rear panel.
- Make sure that the power cord is never crimped or damaged. Check the device and the power cord from time to time.
- If the lens is obviously damaged, it has to be replaced.
- If device was dropped or struck, disconnect mains power supply immediately. Have a qualified engineer inspect for safety before operating.
- If the device has been exposed to drastic temperature fluctuation (e.g. after transportation), do not switch it on immediately. The arising condensation water might damage your device. Leave the device switched off until it has reached room temperature.
- If your Showtec device fails to work properly, discontinue the use immediately. Pack the unit securely (preferably in the original packing material), and return it to your Showtec dealer for service.
- For adult use only. Moving head must be installed beyond the reach of children. Never leave the unit running unattended.
- Never attempt to bypass the thermostatic switch or fuses.
- For replacement use fuses of same type and rating only.
- The user is responsible for correct positioning and operating of the Kanjo. The manufacturer will not accept liability for damages caused by the misuse or incorrect installation of this device.
• This device falls under protection class I. Therefore it is essential to connect the yellow/green conductor to earth.
• During the initial start-up some smoke or smell may arise. This is a normal process and does not necessarily mean that the device is defective.
• Repairs, servicing and electric connection must be carried out by a qualified technician.
• WARRANTY: Till one year after date of purchase.

CAUTION! EYEDAMAGES !!!
NEVER LOOK DIRECTLY INTO THE LIGHTSOURCE !!!

Operating Determinations
• This device is not designed for permanent operation. Consistent operation breaks will ensure that the device will serve you for a long time without defects.
• The minimum distance between light output and the illuminated surface must be bigger than 1 meter.
• The maximum ambient temperature $t_a = 40^\circ C$ must never be exceeded.
• The relative humidity must not exceed 50% with an ambient temperature of 40°C.
• If this device is operated in any other way than the one described in this manual, the product may suffer damages and the warranty becomes void.
• Any other operation may lead to dangers like short-circuit, burns, electric shock, crash, etc.

You endanger your own safety and the safety of others!

Rigging
Please follow the European and national guidelines concerning rigging, trussing and all other safety issues.

Do not attempt the installation yourself!
Always let the installation be carried out by an authorized dealer!

Procedure:
• If the projector is lowered from the ceiling or high joists, professional trussing systems have to be used.
• Use a clamp to mount the projector, with the mounting bracket, to the trussing system.
• The projector must never be fixed swinging freely in the room.
• The installation must always be secured with a safety attachment, e.g. an appropriate safety net or safety cable.
• When rigging, derigging or servicing the projector, always make sure, that the area below the installation site is secured and that there are not any unauthorized people around.
The Kanjo can be placed on a flat stage floor or mounted to any kind of truss with a clamp.

Improper installation can cause serious injuries and/or damage of property!

**Connection with the mains**

Connect the device to the mains with the power-plug. Always check if the right color cable is connected to the right place.

Make sure that the device is always properly connected to the earth!

Improper installation can cause serious injuries and/or damage of property!
Return Procedure

Returned merchandise must be sent prepaid and in the original packing, call tags will not be issued. Package must be clearly labeled with a Return Authorization Number (RMA number). Products returned without an RMA number will be refused. Highlite will not accept the returned goods or any responsibility. Call Highlite 0031-455667723 or mail aftersales@highlite.nl and request an RMA prior to shipping the fixture. Be prepared to provide the model number, serial number and a brief description of the cause for the return. Be sure to properly pack fixture, any shipping damage resulting from inadequate packaging is the customer’s responsibility. Highlite reserves the right to use its own discretion to repair or replace product(s). As a suggestion, proper UPS packing or double-boxing is always a safe method to use.

Note: If you are given an RMA number, please include the following information on a piece of paper inside the box:
01) Your name
02) Your address
03) Your phone number
04) A brief description of the symptoms

Claims

The client has the obligation to check the delivered goods immediately upon delivery for any shortcomings and/or visible defects, or perform this check after our announcement that the goods are at their disposal. Damage incurred in shipping is the responsibility of the shipper; therefore the damage must be reported to the carrier upon receipt of merchandise.

It is the customer’s responsibility to report and submit claims with the shipper in the event that a fixture is damaged due to shipping. Transportation damage has to be reported to us within one day after receipt of the delivery.

Any return shipment has to be made post-paid at all times. Return shipments must be accompanied with a letter defining the reason for return shipment. Non-prepaid return shipments will be refused, unless agreed otherwise in writing.

Complaints against us must be prepared in writing or sent by fax within 10 working days after receipt of the invoice. After this period complaints will not be handled anymore.

Complaints will only then be considered if the client has so far complied with all parts of the agreement, regardless of the agreement from which the obligation is resulting.
Kanjo Spot 60

Description of the device

Features
The Kanjo Spot 60 is an ultra-compact moving head, equipped with a 60W LED light source. The Kanjo Spot 60 is the ideal solution for small clubs and mobile DJs.

- Compact size
- Static gobo and color wheel
- Input voltage: 100-240V AC, 60/50Hz
- Power consumption: 70W
- Light source: 60W LED source
- Color temperature: 7500K
- DMX channels: 8 or 10 channels
- 4-digit LED display
- Control modes: DMX-512, Auto mode, Manual mode, Sound-controlled mode, Slave mode
- Gobo wheel: 7 colors + white
- Color wheel: 7 static metal gobos + open
- Control protocol: DMX-512
- Manual focus
- Dimmer: 0-100%
- Strobe: 0-20Hz
- Pan: 540°
- Tilt: 230°
- Pan/Tilt resolution: 16-bit
- Beam Angle: 18°
- Housing: Metal & Flame retardant plastic
- Certification: CE
- Fuse: F3AL/250V
- Dimensions: 167 x 145 x 270 mm (LxWxH)
- Weight: 2.9 kg

Overview

Fig. 01
Kanjo Spot 60

Frontside

01) 60W LED source
02) 4-digit LED Display + control buttons
03) Built-in microphone

Backside

04) 3-pin DMX signal connector IN
05) 3-pin DMX signal connector OUT
06) Fuse F3AL/250V
07) IEC power connector 100-240V
08) Cooling fan
Installation
Remove all packing materials from the Kanjo Spot 60. Check if all foam and plastic padding is removed.  
Connect all cables.
Do not supply power before the whole system is set up and connected properly. 
Always disconnect from electric mains power supply before cleaning or servicing. 
Damages caused by non-observance are not subject to warranty.

Set Up and Operation
Follow the directions below, as they pertain to your preferred operation mode.  
Before plugging the unit in, always make sure that the power supply matches the product specification voltage. Do not attempt to operate a 120V specification product on 230V power, or vice versa.
Connect the device to the main power supply. The device can be sound-controlled as it is equipped with a built-in microphone.

Control Modes
There are 5 modes:  
- Stand-alone (Auto)  
- Manual mode  
- Sound-controlled  
- Master/Slave  
- DMX-512 (8CH, 10CH)

One Kanjo (Auto and Manual)
01) Fasten the effect light to a firm trussing. Leave at least 0,5 meter on all sides for air circulation.  
02) Plug the end of the electric mains power cord into a proper electric power supply socket.  
03) When the Kanjo is not connected with a DMX cable, it functions as a stand-alone device.  
    Please see pages 16 and 17 for more information about the Auto Mode and Manual Mode.

One Kanjo (Sound-controlled)
01) Fasten the effect light to a firm trussing. Leave at least 0,5 meter on all sides for air circulation.  
02) Plug the end of the electric mains power cord into a proper electric power supply socket.  
03) Turn on the music. If the device is set to sound-control, then the Kanjo will react to the beat of the music. Please see page 16 for more information about the sound-control options.
Multiple Kanjos (Master/Slave control)

01) Fasten the effect light onto firm trussing. Leave at least 0.5 meter on all sides for air circulation.
02) Use a 3-pin XLR cable to connect the Kanjo.

The pins:

01) Earth
02) Signal -
03) Signal +

03) Link the units as shown in fig. 04. Connect the first unit's DMX "out" socket with the second unit's "in" socket, using a DMX-signal cable. Repeat this process to link the second, third, and fourth units. You can use the same functions on the master device as described on page 16 (Auto Mode or Sound-controlled Mode). This means that you can set your desired operation mode on the master device and all slave devices will react the same as the master device.

Multiple Kanjos (Master/Slave control)
Multiple Kanjos (DMX Control)

01) Fasten the effect light to a firm trussing. Leave at least 0.5 meter on all sides for air circulation.
02) Always use a safety cable (ordercode 70140 / 70141).
03) Use a 3-pin XLR cable to connect the Kanjos and other devices.

04) Link the units as shown in fig. 05. Connect the first unit’s DMX “out” socket with the second unit’s “in” socket, using a DMX-signal cable. Repeat this process to link the second, third, and fourth units.

05) Supply electric power: Plug electric mains power cords into each unit’s IEC socket, then plug the other end of the mains power cord into proper electric power supply sockets, starting with the first unit. Do not supply power before the whole system is set up and connected properly.

Multiple Kanjos DMX Set Up

Note: Link all cables before connecting electric power
**Fixture Linking**

You will need a serial data link to run light shows of one or more fixtures using a DMX-512 controller or to run synchronized shows of two or more fixtures set to a master/slave operating mode. The combined number of channels required by all the fixtures on a serial data link determines the number of fixtures the data link can support.

**Important:** Fixtures on a serial data link must be daisy-chained in a single line. To comply with the EIA-485 standard, no more than 30 devices should be connected on one data link. Connecting more than 30 fixtures on one serial data link without the use of a DMX optically isolated splitter may result in deterioration of the digital DMX signal.

Maximum recommended DMX data link distance: 100 meters
Maximum recommended number of fixtures on a DMX data link: 30 fixtures

**Data Cabling**

To link fixtures together, you must obtain data cables. You can purchase DAP Audio certified DMX cables directly from a dealer/distributor or construct your own cable. If you choose to create your own cable, please use data-grade cables that can carry a high quality signal and are less prone to electromagnetic interference.

**DAP Audio DMX Data Cables**

- **DAP Audio Basic microphone cable for allround use. bal. XLR/M 3-pin > XLR/F 3-pin.**
  - **Ordercode** FL01150 (1,5 m), FL013 (3 m), FL016 (6 m), FL0110 (10 m), FL0115 (15 m), FL0120 (20 m).

- **DAP Audio X-type data cable XLR/M 3-pin > XLR/F 3-pin.**
  - **Ordercode** FLX0175 (0,75 m), FLX01150 (1,5 m), FLX013 (3 m), FLX016 (6 m), FLX0110 (10 m).

- **DAP Audio cable for the demanding user with exceptional audio-qualities and connector made by Neutrik®.**
  - **Ordercode** FL71150 (1,5 m), FL713 (3 m), FL716 (6 m), FL7110 (10 m).

- **DAP Audio 110 Ohm cable with digital signal transmission.**
  - **Ordercode** FL0975 (0,75 m), FL09150 (1,5 m), FL093 (3 m), FL096 (6 m), FL0910 (10 m), FL0915 (15 m), FL0920 (20 m).
The Kanjo Spot 60 can be operated with a controller in **control mode** or without the controller in **stand-alone mode**.

**Control Panel**

The fixtures are individually addressed on a data-link and connected to the controller. The fixtures respond to the DMX signal from the controller. (When you select the DMX address and save it, the controller will display the saved DMX address, next time.)

**DMX Addressing**
The control panel on the front side of the base allows you to assign DMX fixture addresses, which is the first channel with which the Kanjo will respond to the controller.

Please note, when you use the controller, the unit has **10** channels.

When using multiple Kanjos, make sure you set the DMX addresses right.

Therefore, the DMX address of the first Kanjo should be **1(001)**; the DMX address of the second Kanjo should be **1+10=11 (011)**; the DMX address of the third Kanjo should be **11+10=21 (021)**, etc.

Please be sure that you do not have any overlapping channels in order to control each Kanjo correctly. If two or more Kanjos are addressed similarly, they will work similarly.

**Controlling:**
After having addressed all Kanjo fixtures, you may now start operating these via your lighting controller.

**Note:** After switching on, the Kanjo will automatically detect whether DMX 512 data is received or not.

If there is no data received at the DMX-input, the “**LED**” on the control panel will not flash.

If not, the problem may be:
- The XLR cable from the controller is not connected with the input of the Kanjo Spot 60.
- The controller is switched off or defective, the cable or connector is defective, or the signal wires are swapped in the input connector.

**Note:** It is necessary to insert an XLR termination plug (with 120 Ohm) in the last fixture in order to ensure proper transmission on the DMX data link.

**Display Off after 55 seconds**
When no button is pressed for 55 seconds, the display will turn off.
To light up the display, you have to press the MENU, UP, DOWN or ENTER button.
Once you have pressed the button, the display will light up.

Main Menu Options

Addr.  DMX-512 mode
chHy.  Pan/Tilt reverse mode
chNd.  Channel mode
SLnd.  Master/Slave mode
Soun.  Sound-controlled mode
LED.  LED display continuous ON/OFF
dISP.  LED display reverse mode
rESC.  Reset
MAin.  Manual mode
ch1..  Manual DMX adjustment mode

1. DMX-512 mode
01) While in the main menu, press the UP/DOWN buttons until the display shows Addr.
02) Press the ENTER button to open the menu.
03) Press the UP/DOWN buttons to choose the desired DMX address. The adjustment range is between 100.1 and 511.1.
04) Press the ENTER button to save the address.

2. Pan/Tilt reverse mode
01) While in the main menu, press the UP/DOWN buttons until the display shows chHy.
02) Press the ENTER button to open the menu.
03) Press the UP/DOWN buttons to toggle between the following options:
   H   Normal mode
   H-Y  Pan normal/ Tilt reversed
   -H   Pan reversed/ Tilt normal
   -H-Y  Pan and Tilt reversed
04) As you toggle between the forementioned options, the moving head will flip accordingly.
05) Press the ENTER button to confirm your choice.

3. Channel mode
01) While in the main menu, press the UP/DOWN buttons until the display shows chNd.
02) Press the ENTER button to enter the menu.
03) Press the UP/DOWN buttons to choose one of the two available modes: L.CH. and I.CH.
04) Press the ENTER button to confirm your choice.
4. Master (Auto)/Slave mode
01) While in the main menu, press the **UP/ DOWN** buttons until the display shows \textit{SLnd}.
02) Press the **ENTER** button to enter the menu.
03) Press the **UP/ DOWN** buttons to choose one of the two modes:
\begin{itemize}
  \item Master mode
  \item Slave mode
\end{itemize}
04) When the display shows \textit{NASC}, press the **ENTER** button to activate Master mode.
05) Press the **MENU** button to enter Master mode.
06) The device is now operating in Master mode and will display its built-in auto show.
07) When the display shows \textit{SLAU}, press the **ENTER** button to activate Slave mode.
08) The device is now operating in Slave mode and will react the same as its master device.

5. Sound-controlled mode
01) While in the main menu, press the \textit{UP/ DOWN} buttons until the display shows \textit{Sound}.
02) Press the **ENTER** button to enter the menu.
03) Press the \textit{UP/ DOWN} buttons to activate/deactivate Sound-controlled mode. Choose between \textit{on} and \textit{off}.
04) Press the **ENTER** button to confirm your choice.
05) The device will now react to the beat of the background music.

6. LED display continuous ON/OFF
01) While in the main menu, press the \textit{UP/ DOWN} buttons until the display shows \textit{LED}.
02) Press the **ENTER** button to enter the menu.
03) Press the \textit{UP/ DOWN} buttons to choose between the two options:
\begin{itemize}
  \item Continuous LED display
  \item LED display OFF after 55 seconds
\end{itemize}
04) Press the **ENTER** button to confirm your choice.

7. LED display reverse mode
01) While in the main menu, press the \textit{UP/ DOWN} buttons until the display shows \textit{d ISP}.
02) Press the **ENTER** button to enter the menu.
03) Press the \textit{UP/ DOWN} buttons to choose between the two options:
\begin{itemize}
  \item Normal view
  \item Vertical flip view
\end{itemize}
04) Press the **ENTER** button to confirm your choice.

8. Reset
01) While in the main menu, press the \textit{UP/ DOWN} buttons until the display shows \textit{rESC}.
02) Press the **ENTER** button to enter the menu.
03) Press the \textit{UP/ DOWN} buttons to activate/cancel reset. Choose between \textit{on} and \textit{off}.
04) If the display shows \textit{on}, press the **ENTER** button. The device will reset the settings.
05) If the display shows \textit{off}, press the **ENTER** button. The device will return to the main menu.
9. Manual mode

01) While in the main menu, press the UP/DOWN buttons until the display shows Manual Mode.
02) Press the ENTER button to enter the menu.
03) Press the UP/DOWN buttons to choose between the two options:
    Manual Mode ON
    Manual Mode OFF
04) When the display shows Manual Mode ON, press the ENTER button.
05) Now it is possible to manually adjust the DMX channels (Manual DMX adjustment mode, see below).
06) The channel numbers correspond with their DMX functions (see chapter DMX Channels, page 18).

10. Manual DMX adjustment mode

Manual mode (see above) must be set to ON for this mode to work.
For more information about the functions of each channel, get acquainted with chapter DMX Channels, page 18.

01) While in the main menu, press the UP and DOWN buttons to find one of the 10 available DMX channels.
02) Press the ENTER button to enter edition mode.
03) Press the UP and DOWN buttons to adjust the DMX channel values.
04) The adjustment range of each channel is between 000 and 255.
05) Press the ENTER button to save changes.
DMX Channels

8 channels

**Channel 1 - Horizontal movement (Pan)**
Push the slider up, in order to move head horizontally (PAN).
Gradual head adjustment from one end of the slider to the other (0-255, 128-center).
The head can be turned by 540° and stopped at any position you wish.

**Channel 2 - Vertical movement (Tilt)**
Push the slider, up in order to move head vertically (TILT).
Gradual head adjustment from one end of the slider to the other (0-255, 128-center).
The head can be turned by 230° and stopped at any position you wish.

**Channel 3 - PAN/ TILT Speed**
0-255 From Max Speed (0) to Min. Speed (255)

**Channel 4 - Color Wheel**

10 channels

Channel 1 - Horizontal movement (Pan)
Push the slider up, in order to move head horizontally (PAN).
Gradual head adjustment from one end of the slider to the other (0-255, 128-center).
The head can be turned by 540° and stopped at any position you wish.

Channel 2 - Pan fine 16 bit

Channel 3 - Vertical movement (Tilt)
Push the slider, up in order to move head vertically (TILT).
Gradual head adjustment from one end of the slider to the other (0-255, 128-center).
The head can be turned by 230° and stopped at any position you wish.

Channel 4 - Tilt fine 16 bit

Channel 5 - PAN/TILT Speed

| 0-255 | From Max Speed (0) to Min. Speed (255) |

Channel 6 - Color Wheel

| 0-15  | White         |
| 16-31 | Red           |
| 32-47 | Green         |

**Maintenance**

The operator has to make sure that safety-related and machine-technical installations are to be inspected by an expert after every year in the course of an acceptance test.

The operator has to make sure that safety-related and machine-technical installations are to be inspected by a skilled person once a year.

The following points have to be considered during the inspection:

01) All screws used for installing the device or parts of the device have to be tightly connected and must not be corroded.

02) There may not be any deformations on housings, fixations and installation spots.

03) Mechanically moving parts like axles, eyes and others may not show any traces of wearing.

04) The electric power supply cables must not show any damages or material fatigue.

The Kanjo Spot 60 requires almost no maintenance. However, you should keep the unit clean. Otherwise, the fixture’s light output will be significantly reduced. Disconnect the mains power supply, and then wipe the cover with a damp cloth. Do not immerse in liquid. Wipe lens clean with glass cleaner and a soft cloth. Do not use alcohol or solvents.

The front lens will require weekly cleaning, as smoke-fluid tends to build up residues, reducing the light-output very quickly.

The cooling fans, color wheel, the gobo wheel, the gobos and the internal lenses should be cleaned monthly, with a soft brush.

Please clean internal components once a year with a light brush and vacuum cleaner. Keep connections clean. Disconnect electric power, and then wipe the DMX and audio connections with a damp cloth. Make sure connections are thoroughly dry before linking equipment or supplying electric power.

**Replacing the Fuse**

Power surges, short-circuit or inappropriate electrical power supply may cause a fuse to burn out. If the fuse burns out, the product will not function whatsoever. If this happens, follow the directions below:

01) Unplug the unit from electric power source.

02) Insert a flat-headed screwdriver into a slot in the fuse cover. Gently pry up the fuse cover. The fuse will come out.

03) Remove the used fuse. If brown or unclear, it is burned out.

04) Insert the replacement fuse into the holder. Reinsert the fuse cover. Be sure to use a fuse of the same type and specification. See the product specification label for details.

Troubleshooting

This troubleshooting guide is meant to help solve simple problems. If a problem occurs, carry out the steps below in sequence until a solution is found. Once the unit operates properly, do not carry out following steps.

No Light

If the light effect does not operate properly, refer servicing to a technician. Suspect three potential problem areas as: the power supply, the LEDs, the fuse.

01) Power supply. Check that the unit is plugged into an appropriate power supply.
02) The LEDs. Return the Kanjo to your Showtec dealer.
03) The fuse. Replace the fuse. See page 20 for replacing the fuse.
04) If all of the above appears to be O.K., plug the unit in again.
05) If you are unable to determine the cause of the problem, do not open the Kanjo, as this may damage the unit and the warranty will become void.
06) Return the device to your Showtec dealer.
## No Response to DMX

Suspect the DMX cable or connectors, a controller malfunction, a light effect DMX card malfunction.

01) Check the DMX setting. Make sure that DMX addresses are correct.

02) Check the DMX cable: Unplug the unit; change the DMX cable; then reconnect to electrical power. Try your DMX control again.

03) Determine whether the controller or light effect is at fault. Does the controller operate properly with other DMX products? If not, take the controller in for repair. If so, take the DMX cable and the light effect to a qualified technician.

### Operating and Programming:

- **Signal pin OUT:** Pin 1 (earth), pin 2 (-), pin 3 (+)
- **DMX Mode:** 8, 10 channels
- **Signal input:** 3-pin XLR IN
- **Signal output:** 3-pin XLR OUT

### Electro-mechanical effects:

- **LED Quantity:** 1 x 60W LED
- **Color temperature:** 7500K
- **Focus:** Manual
- **Beam angle:** 18°
- **Pan & Tilt range:** 540° / 230°
- **Dimmer:** 0-100%
- **Strobe:** 0-20Hz
- **Gobo wheel:** 7 static metal gobos + open
- **Color wheel:** 7 colors + white
- **Housing:** Metal & Flame retardant plastic
- **DMX-control:** via standard DMX-controller
- **On Board:** 4-digit LED display for easy setup
- **Control:** DMX-512, Auto mode, Manual mode, Sound-controlled mode, Slave mode
- **Connections:** Dedicated Schuko to IEC & Data connector
- **Cooling:** Internal fan
